LESS MEAT IF BACK AND KIDNEYS HURT

Take a glass of Salts to Kidneys if Bladder bothers you.

Eating meat regularly eventually produces kidney trouble in some form or other, says a well-known authori-ty, because the uric acid in meat excites the kidneys, they become over-worked; get sluggish; clog up and cause all sorts of distress, particul-arly backache and misery in the kid-

ACK KING.

J. MACK KING.

ariy backache and misery in the kidney region; rheumatic twinges, severe headaches, acid stomach, constipation; torpid liver, sleeplessness, bladder and urinary irritation.

The moment your back hurls or kidneys aren't acting right, or if bladder bothers you, get about four ounces of Jad Salts from any good pharmacy, take a tablespontul in a glass of water brimary. Platferm: Efficiency in as school room, better schools in the of and mill districts, more Anderscounty girls as teachers and no itality whatever in selecting teach
This famous salts is made from the acid of grapes and lemon juice, combined with lithia, and has been used for generations to flush clogged kidneys and stimulate them to cormal neys and stimulate them to ormal activity; also to neutralize the acids in the urine so it no longer irritates thus ending bladder disorders.

be for re-election to the office of perintendent of Education, subject the rules of the Democratic party.

J. B. FELTON.

am a candidate for Superintendent thus avoiding serious kidney disease.

Fine Record

Lebanon High School is Proud of Athletic Teams of Past Session

(By Max Welborn.)
Lebanon high school is justly proud of her athletic teams put out the next session. Though they did not play but ten games with ther school teams, it was not inac tivity on their manager's part, but cowardice or unconcern on the part of other teams. In basketball, Sen-eca was Lebanon's most troublesome rival. But in the last game with them, in the Clemson gymnasium, they were defeated with a score of 34 to 13. Anderson gave no trouble at all. Ive went down ingloriously to the tune of 43 to 5. But it is being rumored at Lebanon that Iva under the coaching of one of their lady teachers, will put out a vinning

team next year.
The Lebanon baseball team has never "tasted" defeat. The reason for its success is that the boys stick together and play together. Though this team has played few games with other schools it was because they couldn't secure them.

Lebanon also turned out a run-ning team which made the 440 yard relay (one mile) in 4 minutes 10 seconds in race with the Denver school

track team as the Lebanon principal decided that it should not participate in the county field, day events. Considering the few boys country schools have to pick from the Leba-

No attempt was made to here to

non teams are wonders. But pros-pects are not as bright for next year as the eleventh grade has been dropped and many large boys have either finished or will quit school. But the year of 1916 will always be memorable at Lebanon.

.02..... ... 5 CELERY FOR FALL AND WINTER USE:

Obtaining Stocky Plants, Prepar-Clemeon College, S. C., June 13— By this time the plants should be from four to six inches tall. In or-Ny this time the plants should be from four to six inches tall. In order to make them more stocky two inches of the top should be sheared. The celery plants will be ready for transplanting from the first to the twentieth of August. Select a very rich plece of land preferably a sandy loam soil, and prepare in the same way as for planting corn in the water furrow, the rows heling six feet apart. Apply an 8.4-2 commercial fertilizer at the rate of 8 0 pounds por acre. Mix thoroughly with the plow and then list with two furrows. This will form a slight ridge within the rater furrow. This ridge is then smoothed off with a rake, and the plants are eight inches apart to the row. About one-third of the leaf surface should be ameyed before setting the plants. The transplanting is done in the same way as transplanting cabbage or fomate plants. Cultivate clean throughout the summer. Celery may follow any spring crop such as calcast fries positions for banching will be given later.

Perchaught.

People are learning that a litter thought often saves that a litter thought of the last testing a pense. Here is an instrument litter. Caldwell, Chio, says: I it believe that the lamily has believe that the lamily has believe that the lamily has been considered than the lamily has been distributed than the lamily has been distributed than the lamily has been distributed.

be given later.

REFUGEES CROWD

Government Now Caring For Nearly a Million Persons.

LIVE ON 25 CENTS A DAY.

Included Among These Are 143,000 Belgians and 11,000 Servians-Others Come From Fortified French Cities Near Battle Lines-Some Earn Own Living.

Nearly a million people, the exact figures being 028,000, who have been driven from their homes are scattered throughout France and draw allow ances from the government, half the number being under sixteen years of age. The greatest number, 762,000, are French, refugees from the invaded departments, from the fortified towns which could no longer keep "useless mouths" and from the danger zone of the front. The Belgians number 143,-000; Alsace and Lorraine have sent 12, 000 and Servia 11,000.

In addition to these refugees who need state ald, there are about 120,000 who have means of their own, but these decrease as their means become exhausted.

The first class of refugees to be aided was the "useless mouths" from for-tresses like Maubeuge, Verdun, Toul, Epinal and Belfort. Before the war had lasted a fortnight 25,000 of these had to be provided with homes else-

After the battle of Charleroi and the rapid onrush of the Germans 115,000 Belgians and French had to be sent to the rear, and when Paris was threatened with an attack early in Sentember 15,000 who had built homes within the zone of the capital's fortifications had to be moved.

Live With Private Families. Refugees were first installed in emp-ty buildings, schoolhouses, etc., but it

vas soon found that some regular principle must be adopted, and every fam-lly not touched by the war was called upon to receive in refugee family, the state paying the enbenses.

The battle of the Marne slackened the inflow of refugees for a time, but when operations moved to the north the number became so great that they had to be moved not only by train, but by ships, which carried them from Dunkirk, Calaia and Boulogue to La Paillee, whence they are distributed among the southwest departments.

Many families who had been taken to
Germany from the invaded districts
were returned via Switzerland and had
to be provided for.

The money ald given to refugees has been fixed at the same rate as the allowance made to the wives and families of mobilized soldiers, 25 cents a day for each adult and 10 cents for each child under spreen.

When refugees had settled down and

could earn something by their labor a comboult question had to be solved. It ould manifestly be unfair to suppress the grant of a poor woman, who could only earn, say, 25 cents a day, and yet those who could earn a living wage (and it must be remembered that the war had caused a great demand for la-bor) could not expect to receive a great in addition. The question was left to the prefect of the department to decide with the aid of three members of a committee formed to distribute aid in kind the gifts of private individuals, beneficent societies, etc. No hard and fast rules were laid down, but any refigee who without valid excuse refused any offer of work which was properly paid and suited his or her capacities

had the allowance suppressed.

Many refugees have found well paid work in munition factories and have thus been able to maintain themselves and co-operate directly foward their re turn to their old homes.

SON'S DEATH LIKE GRANT'S

Former President's Smaking Mabit
Taken Up by Younger Man.
The real cruse of the death of General Frederick D. Grant of April I.
1912, was made public for the first time the other day. He ded of cancer of the throat superinduced by the excessive use of tobacco. His father, General U. S. Grant field from the same rause, and the malignant growth was attributed to the same agency.
The facts regarding the death of the younger Grant are contained in the following paragraph from an article by Dr. Robert Able of New Ent. senior surgeon to St. Ethe's hospital, who was with him when he died on "The Legace of the Intemperate Use of Tobacco," which appeared in the Medical Record:

"I could not help reminding him to patient) that one of our great national increas amoked increasantly, as every one knew, and suffered and died from the consequences of disease of his throat. His distinguished son also a beroic figure in our array, stopped the same lastic suffered and died of the same terrible consequences. This is a heavy price to pay for the intemperate industry and amateral habit.

Hen Hatches Turtiest Gest Grant.

Slip a few Prince Albert smokes into your system!

You've heard many an earful about the Prince Albert patented process that cuts out bite and parch and lets yousmoke your fill without a comeback! Stake your bank roll that it proves out every hour of the day.

Prince Albert has always been sold without coupons or premiums. We prefer to give quality!

There's sport smoking a pipe or rolling your own, but you know that you've got to have the right tobacco! We tell you Prince Albert will bang the doors wide open for you to come in on a good time firing up every little so often, without a

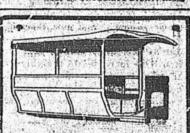

regret! You'll feel like your smoke past has been wasted and will be sorry you carried back up for a fresh start.

You swing on this say-so like it was a tip to a thousand-dollar bill! It's worth that in happiness and contentment to you; to every man' who knows what can be gotten out of a chummy jimmy pipe or a makin's

cigarette with Prince Albert for "packing" R. J. REVNOLDS TORACCO CO.
